22.10.2007

Dear Sir,

Subject : Expression of Interest for the planning and design of
A 1600 bed teaching Hospital and Medical college

Introduction

In 2006, the Anil Agarwal Foundation entered in to an MOU with the Orissa Government to set up the Vedanta University, a 'not-for-profit' initiative along the picturesque Puri-Konark marine drive in Orissa. The University and associated townships are on a 6300 acre campus, master planned by Ayers Saint Gross, the notable university architects and planners from Baltimore, Maryland USA.

The university is planned to have an ultimate strength of 100,000 students of International and Indian backgrounds studying around 95 diverse streams of learning. The university is planned to start intake of its first batch of students in 2009.

As part of the first Phase, we will build about 2.5 million square feet of academic buildings which include Humanities, Science, Engineering, Architecture, Business and Law colleges, the main University library along with residences for about 3500 students and 700 faculty and staff. In Phase 1, we will also build the hospital with residences for staff, with the Medical College to follow subsequently.

Project

The hospital is envisaged as a 1600 bed teaching hospital which will be build in phases. An initial phase may comprise about 250 to 300 beds. The hospital should have super specialty streams which are needed both in the region and nationally. The hospital will have both paying and nonpaying patients, with the exact mix to be determined by the business model of building a self sustaining hospital.

Keeping all this in mind, we seek experts who can advise us on the way forward to make our Chairman's vision into reality by helping us

a) Solidify our mission statement and also develop a business model for the same.

- b) Provide us with detailed project report and space programs for the hospital and medical college.
- c) Review the architectural plan for functionality and adherence to program.
- d) Additionally we are seeking hospital design consultants who will develop building concepts and detailed architectural, structural and MEP drawings for tender. This would be a separate component.

Kindly let us know if your are interested in participating in this project. Interested parties may send us details of past performance in similar projects along with a list of key personals by 30th October 2007.

Thanking you
for Anil Agarwal Foundation

C. Joseph
Associate GM (Projects)
